

THE WORLD OVER

OBJECTS TO FIREMEN HAVING "CLOCKWINDER"

TORONTO—Alderman W. W. Croft objected to the city paying a man \$1,000 a year to wind clocks in fire halls and other towers.

"Can you imagine having a man to wind clocks in fire halls," he said Wednesday in a luncheon address, "if there is a fireman should do it and if they can't I'll be glad to stop by some time and wind the clocks for them."

SAYS TELEVISION READY FOR THE HOMES

NEW YORK—Television is ready for the home, David Sarnoff, president of the Radio Corporation of America, told a board of directors of the Radio Manufacturers Association. At the same time he announced that his company is planning to manufacture a limited quantity of television receivers which it expects to market by the time the New York world's fair opens next April 1.

GENERAL MOTORS TO RE-EMPLOY WORKERS

TORONTO—Harry J. Carmichael, vice-president and general manager of General Motors of Canada Ltd., said Wednesday the company soon will have all employees back on full time with 1939 resources for export trade "distinctly favorable."

During the past fortnight more than 2,500 men have been recalled to the factories at Oshawa, Windsor, St. Catharines and Regina. Within a month it is expected 3,000 more will be recalled with the maximum production payroll of \$5,000 reached in the four factories.

Production at Regina starts Oct. 25, two months earlier than last year.

AVOID ACCIDENTS AT ALL LEVEL CROSSINGS

With the advent of fall and early winter conditions, need of motorists exercising special care at level crossings is again emphasized by officials of the Alberta Motor Association.

Only a few days ago a news report told of five persons being killed at level crossings in Ontario. Similar accidents have been reported in recent weeks in other parts of the country, each with its quota of fatalities.

In this province satisfaction is expressed over the policy of eliminating level crossings where this is possible. A recent government announcement was to the effect that a right-angle turn on the Jasper highway, east of Spruce Grove, is to be eliminated by the construction of an overpass some two miles further west. Total estimated cost being \$50,000.

The province is seeking to have part of this cost shared by the Dominion through a grant from the grade crossing fund, administered by the transportation board.

At the present season, when driving conditions are most dangerous, it is during the summer, it is more necessary than ever for drivers to use special care at railway crossings. Violation is not as good as at other times, making driving difficult, while there always is the danger of skidding. Avoid

MR. AND MRS. A. REID CELEBRATE GOLDEN WEDDING ANNIVERSARY

Married Fifty Years on
Wed. October 26th

Mr. and Mrs. Alex Reid Sr. of Carbon celebrated their golden wedding anniversary at their home in Carbon on Wednesday, October 26th, and are receiving congratulations from many friends on the occasion of their fiftieth wedding anniversary.

Mr. Reid was born in Strathaven in 1865 and Mrs. Reid was born in Glasgow in 1863. They were married in 1888 on October 26th by the Rev. Mr. Simpson and after living the first 14 years of their married life in the old country they emigrated to Canada and after working at odd jobs for a year or so, Mr. Reid homesteaded in the vicinity in 1903, being one of the first farmers to take up land in the vicinity. At that time it was thought impossible to raise wheat in this part of Alberta, but ranching was the main ambition of the homesteader, and Mr. Reid can tell some real experiences in the early days around Carbon.

Mr. and Mrs. Reid have dwelled in Carbon since homesteading here, and since 1916 Mr. Reid has been Secretary of the Village of Carbon and the Carbon School district.

Mr. and Mrs. Alex Reid's family are well known here, of whom five are living.

We extend congratulations to Mr. and Mrs. Reid on the occasion of their anniversary.

LONG YEARS AGO

October 29, 1927.

F.J. King and J. Becker have new Ford trucks, and M. Robinson and E. Becker have new Chrysler cars.

Mr. R. Wade, of Swallow, has sold his half section with standing crop for a cash price of \$30,000.

Wm. Edwards, son of Mr. and Mrs. Percy Edwards was rushed to a Calgary hospital, suffering from appendicitis.

Olo Johnson has returned to his home in Victoria after spending the past month in this district, looking after the harvesting of the crop on his farm.

Miss Catherine Hay was operated on for appendicitis on Monday in a Calgary hospital.

accidents by deciding to "stop, look and listen," A.M.A. officials advise at this time.

PLANS AERIAL SURVEY OF THE DINOSAUR FIELDS

Dr. Barnum Brown of New York, internationally-known paleontologist, arrived in Edmonton by plane last Thursday to start his aerial survey of Alberta, where lie the petrifactions of ancient dinosaurs.

Dr. Brown flew to Edmonton from Billings, Montana, and his aerial survey will be carried out during the next month from Edmonton south to the international boundary. The picture Dr. Brown will take from the air will be directed at discovering the location of new areas which lie the holdalls of the Red Deer River valley, will yield fossilized specimens of wild life that roamed Alberta over 60,000,000 years ago.

CARBON BLACK COALS TO INSTAL MACHINERY FOR LONG-WALL MINE

Expect Equipment to be Operating
By First of November

A new coal cutting machine was installed at the Carbon Black Coals to instal machinery for long-wall mine. The machine is a new model, the Oliphant in the Carbon Black Coals mine at Carbon and the new machine will be put to use, preparing the coal for shipment.

Mr. Oliphant has also ordered new equipment for the institution of a long wall system of mining coal and the machinery is expected to arrive about the end of the month, and will immediately be put to use, preparing the coal for shipment.

This mine, along with the coal properties in the vicinity are overtaxed at the present time and cannot keep up with the demand for coal. The local trade is large this fall and big trucks taking as much as seven tons to a load, are hauling considerable coal, especially west to Carstairs, Didsbury and Olds, where a large market for Carbon coal is available.

LITTLE ITEMS OF LOCAL INTEREST

H. T. Sobey, manager of the Crown Lumber Yard at Carbon, was a business visitor to Calgary on Tuesday.

Mr. and Mrs. Clarence Hay and son Bobby were Carbon visitors for a few days last week and left Saturday for their home in Coroneraton.

The ladies of the German Baptist Church held a successful bazaar in the old bank building in Carbon on Saturday afternoon.

Mr. and Mrs. W. Poxon of Drumheller were Carbon visitors Saturday evening.

Mr. W. Brooks and Mrs. E. Brooks of Calgary arrived Sunday morning with Mrs. Elliott. Mrs. Brooks is remaining in Carbon for a few days.

Mr. and Mrs. W. E. Watkins of Champion arrived Saturday evening and spent the week end visiting with Mr. and Mrs. A.P. McKibbin. They returned to their home in the Champion district on Monday.

Dr. Burrill was in town on Monday with his new dental car. This car is in the form of a trailer, and is equipped with the latest in dental equipment.

Mr. and Mrs. Perry Johnson of Carstairs were Carbon visitors Sunday.

Born, on Thursday, October 13, to Mr. and Mrs. Alf. Gouin of Redlands a son.

Word was received from Hinton this week that Mr. W.J. McInnis and Mrs. Jennie Ramsay have been married and will make their home in the north-western mining town.

Willard Rogers of Calgary spent Saturday in Carbon, returning to the city Saturday night.

WANTED—Young single man wants work for the winter months. Have spent all my life on farm—Ernest Kopulows, Three Hills, or apply at the Chronicle Office.

Chas. Wright spent the first of the week in Calgary.

Cloudy skies on Wednesday indicate an approaching storm.

The following prices are being paid this week for eggs at the local station: A large, 25¢; A medium, 20¢; A small, 15¢; B's 12¢; C's 10¢; D's 8¢. These prices were supplied by Mr. T.H. Ritchie, the local grader.

Mr. Johnson of Calgary arrived on Tuesday and is visiting with his sister Mrs. S.N. Wright.

Halloween OLD FRIENDS

Oh! Mr. Ghost, with your rainment of white,
Come to frighten me out of my wit in the night!
With your eyes flaming forth like two coals and your breath,
Bearing fire that would scare a poor mortal to death;
With your rows of great teeth grinning widely at me
And your loose-hanging gown flap- ping under the tree
In the orchard out there—Oh! I know how you're made,
And the youngsters who made you, so I'm not afraid.

Oh! Mr. Ghost, I am waiting for you;
You are an old friend of mine, both trustworthy and true;
For that old head of yours that gave me fright
Was in somebody's pumpkin patch only last night.

And out of my window not two hours ago
I saw your head scooped out by Bill, Jack, and Joe;
And I saw you stuck up on the end of a stick.

Before you were stationed right here in my path.

Oh! Mr. Ghost with your garments so fine,
I know what became of that sheet on the line
In the neighbor's back yard, newly washed and alone.

It is hiding that lady that you use for backbone,
And the candle that burned in the kitchen last night
Lights those cavernous eyes that near gave me fright.

Indeed you are made from such odds and ends
That I feel you're the warmest of very old friends.

And those sepulchral groans you are making at me,
I can hear you come—from that big apple tree.

It is right behind you—I have heard them before
They were begging for cake at the side kitchen door.

So be sure, Mr. Ghost, with your pumpkin and lath,
You don't get a sheet, when I came up the path.

I heard a boy chuckle up there in the night
And that is the reason you can't frighten me!

—W. J. Foley.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

The whole world has had a miraculous escape from a devastating war. Had war occurred, millions of dollars worth of property would have been destroyed. The danger came because of the determination of Germany to acquire new lands.

Some people consider that the German—and one can add to this the Italian and Japanese—motives are those of unwarranted aggression, of a love for war.

A study of Hitler's books and his speeches, however, and of matters underlying worldwide economy, convinces me, at least, that the real motive actuating the aggression of Germany, Italy and Japan is simply that of a desire to secure the essential foodstuffs and raw materials necessary for the welfare of their people and which products they are denied to them, in the quantities they need, by the high tariff policies of the democratic countries of the world.

The way to satisfy Germany and the other "have not" countries, and so to avoid war in the future, in my humble opinion, is simple. It is to reduce existing high tariffs, and voluntarily the exchange of more raw materials and foodstuffs of the farmers for more of the goods and commodities of the world's industrial workers.

Following factors have tended to raise price: Depreciation of the pound sterling; Australian crop starts to deteriorate, unlikely to approach last year's outcome; India purchases Australian wheat; Rumanian wheat heavily loaded with weevil and mildew; satisfactory soil condition in U.S. Southwest; Russia threshing still behind a year ago.

Following factors have tended to lower price: Further devaluation of the Argentine; Russia exports in volume; Pressure of low grade French wheat; Abundant subsoil reserve in Balkans; Belgium releases wheat held for emergency; European winter wheat growing progress normally; Native wheat supplies abundant in most of Europe; U.S. corn, oats and barley estimates increased.

GAMING HOUSE RAIDED

A local card sanctuary was raided by members of the R.C.M.P. under direction of Const. Shaw of Carbon on Saturday evening and on Monday 25 offenders were arraigned here before Magistrate. Steering and Granger charged with violating the gaming clauses of the Criminal Code of Canada. Upon conviction the keeper of the house was given a fine of \$40 and costs; 14 paid fines of \$5 and costs on a first offence; seven were fined \$10 and costs on a second offence, and one case was dismissed. All fines were paid with the exception of one, who was given until Nov. 8th to raise the money.

LITTLE ITEMS OF LOCAL INTEREST

Dick Appleyard spent a few days in Calgary the first part of the week.

The Lady Roberts Chapter I.O.B.E. will hold a novelty Armistice Dance in the Farmers' Exchange hall, Carbon, Friday, November 11th. Len Davis's orchestra has been engaged to furnish the music and all time is promised those who attend.

An Auction Sale of donated miscellaneous articles will be held on Saturday, October 29, at 2 p.m. at S.N. Wright's office. The sale will be in aid of the Anglican church and is an open event, so bring in any articles you may have.

OPEN SEASON FOR PRAIRIE CHICKEN IN THE NORTH

EDMONTON—Opening of the shooting season for prairie chicken and partridge form October 20 to November 3, both days inclusive, was announced by Hon. D.B. Mullen, Minister of Agriculture.

The big limit is five birds a day and 25 for the season.

The open season, said the minister, would be in that part of the province lying north of a line commencing at Butte, at the eastern boundary of the province and then west on the C.N.R. line through Edmonton to the boundary of the forest reserve just west of entrance.

The season for prairie chicken shooting has been closed for the past three years.

American Speaker Believes Greatest Protection of Peace Is the Strength of Britain

"I cannot help but hope and pray that the spirit of the Anglo-Saxons through the centuries will still continue to animate our public policies on this continent," declared Major Ninian Althor, associate editor of the Columbia Dispatch, Cleveland, Ohio, concluding an address on "This Infatuated World" at the luncheon of the Canadian Club in the Chateau Laurier at Ottawa.

Major Althor told of some of his impressions derived from a visit to Europe some months ago. He said: "We ought never to forget the great debt we owe to the old barons at Runnymede who secured the signing of the Magna Carta. Nor those who shook their fists in the face of Charles I. and secured protection of Europe today was the strength of Britain."

War lords had since arisen and jeopardized freedom. But constitutional freedom had been maintained by the English-speaking peoples. He hoped the relations that had existed between the United States and Canada would perpetuate themselves.

As the Great War had begun, fought, as was said, "to make the world safe for democracy," and for this to 12 millions of men were "battered and blinded, then I think that war is one of the colossal failures of history," in view of what has since happened.

It was thus the Russians had got rid of the Romanoffs and established a Duma, "but how quickly that picture faded."

We thought we had made 60 million German safe for democracy, and sent the Kaiser to backwash. World that picture, too, faded. It was removed by an error of judgment and dictators whose infidelity is expressed in their epigrams: "How a minority, becoming a majority, loses the minority."

Russia had got rid of folks she didn't want and clamped down a regimented form of government so severe that no man dare criticize except at the risk of persecution or execution.

In Italy there was the same kind of dictatorial government. The country had been faced with disintegration until the advent of Benito Mussolini. An Italian had told him, said Major Althor: "We were saved from economic disintegration by the rise of Hitler. We now have no labor troubles and we will stick to what we have got until we get something better."

As regards Germany, political nightmares did not exist. "You don't have to be a Nazi, but you can't be anything else." Those that continued which saw the rise of Hitler, Major Althor said he witnessed the persecution of the Roman Catholic Church and the treasuring on their religious rights.

He would soon be paying a debt on a scale that was tremendous. He said he had asked Premier Chamberlain whether they were justified in the middle western States in a feeling of pessimism on the future of Europe. He had asked him was democracy on the wane in Europe.

The answer of the British to Mussolini had been to launch their huge armament scheme of \$3,000,000,000. The speaker said he thought the greatest protection of peace of Europe today was the strength of Britain.

Personally, he was of the opinion the United States still stood "for the reign of law, based on the consent of the governed and sustained by the organized opinion of mankind." He thought perhaps there was a slight trend towards centralization of power in the government, and the obliteration of differences between executive and judicial functions.

Not Perfected Yet
Students at McGill Are Working On Luckless sapling sitting under a white hot spotlight, surrounded by a gang of questioning poles will be old. It is a tree, and being developed by McGill students materializes.

Poe of all criminals and errant husbands, the truth drug was originally discovered by government, and the idea is that the person receiving the drug loses consciousness, but while "going under" he becomes talkative and sometimes even exceedingly frank. As it can plainly be seen, this might offer a means of extracting the truth, but she may be trapped while "coming out."

The theory involved is that the person's mind will be separated while under the influence of the drug. Ordinarily the will prevents the man from making dangerous admissions. But with the will subdued the mind gives up its store of facts and opinions.

Helpful to psychoanalysts in probing the inner consciousness of minds which may be the root of mental and physical disturbances, the drug is still in the stage where it is of most assistance to the dose novel writer. Its use in the courts is a thing which McGillites believe still lies in the future.

Grain Standards
New Export Standard For Garret What Is Decided Present definitions commercial wheat grades were left intact by decision of the western committee on grain standards.

It was decided to set up new export standards for Nos. 1, 2 and 3 C.W. Garret wheat, as well as for Nos. 1 and 2 C.W. Durum. The committee recommended further study be made to obtain more information on the peculiar condition encountered in this year's crop in which appreciable quantities of wheat have been degraded for improperly cleaning by the Treaty of Versailles, and nobody had seemed to be able to speak for the German Nazis. Hitler had come to power and promised to "restore their national self-respect."

NEW AIR SAFETY DEVICE

This diagram shows the value of the new terrain clearance indicator to aviation. It has been tested on a series of flights over New York and pronounced a success. The apparatus is destined to prevent disastrous air crashes such as have occurred recently in mountainous regions. In flight, the old altimeter (bright indicator) showed the height above sea level only; the new indicator shows the airman how high he is above the terrain over which he is flying.

Taking Pleasure Jaunt
Former British Columbia Newspaper Man Selling East About World Favored by a spanking tallwind, Ernest J. Moy, formerly of British Columbia, sailed his 58-foot "luxury" yacht, the Dione, southward through the Gulf of Mexico waters on the first leg of an 80,000-mile story book pleasure jaunt around the world.

Aboard with Mr. Moy was his young wife, dressed in jersey and slacks and with a boy scout knitted strap on her wrist, and two Tampa seamen, Charles Schetter, 34, and William Hughes, 22. The crew's cleanest pants have, "London," via Singapore and way points, and Mr. Moy said, "When we get there, don't matter."

In fact the happy shipper, who has but one arm, said the jaunt may take five or even ten years. He spoke freely of his life's ambition to have been to circle the globe in his own ship.

Mr. Moy, who said he at one time owned several British Columbia newspapers and is now retired, purchased his yacht in New Haven, Conn., last year and with his wife sailed down the Atlantic coast and up the Gulf of Tampa. His home is in Seattle, Wash. He spent his previous lifetime making and preparing the craft for the long trip now under way, and included in equipment, rifles, side arms and a supply of tear gas, to be used, he said, "just in case."

Also aboard were hundreds of small articles such as scissors, knives, salt-pen, mirrors and colored ribbons to be used in trading with natives on the many islands en route.

Will Make Christmas Puddings
Princess Elizabeth Preparing To Bake Some For Her Friends Princess Elizabeth is preparing to bake Christmas puddings herself as gifts for some of her friends. Queen Elizabeth gave her an old family recipe which she herself used as a young girl. The Princess wrote to the Buckingham Palace chef, giving him a list of ingredients she wished to have at her disposal when she returned from Balmoral, Scotland.

When in London the 12-year-old Princess passes one day a week in the palace kitchens under the instructions of the chef.

Forthcoming British Naval Program for 1939 Reported To Be On a Large Scale

International Plotting Match
Lord Tweedmouth Shakes Hands With Young Competitor Grizzled farmers on chugging tractors or behind straining teams of big horses, Lord Tweedmouth will welcome to the international plotting match, blue-ribbon event of the farm world that has attracted 600 competitors and 125,000 spectators to the rich farmland of the central Ontario mining flats.

Domesticated veterans of the age-old plow turned east upon as the Governor-General trumped rain-dampened ground examining the new furrows, poking a crown with his cane or congratulating a smiling competitor.

Speaking from the platform of a sound-broadcasting truck, the Governor-General said that coming from England and the threats of war to Canada and peace, "this plowing match is a good omen that we shall be allowed to get on with our proper business."

He mentioned briefly the European crisis that reached its peak during the English visit. He was never more impressed, he said, by the coolness of the British, their fortitude and common sense.

Artificial Wool
New Process For Manufacturing Product From Caslon A new process for the manufacture of artificial wool has been devised, it has been invented by two members of the United States Department of Agriculture. The inventors believe that it is the best yet devised for that used in making viscose rayon from cellulose. It differs from the Italian method of making artificial wool from caslon. The fibre resulting from the American process closely resembles the best quality of mohair wool. The new process is similar to that used in making viscose rayon from cellulose. It differs from the Italian method of making artificial wool from caslon. The fibre resulting from the American process closely resembles the best quality of mohair wool.

Has Important Place
Analysis Shows Man Over Forty Is Wanted In Business The wool complaint that the modern industrial and employed man finds a sharp contradiction in an analysis of employment made recently by insurance companies in the United States.

The survey was conducted on a national scale and was launched to determine what, if any, changes in the proportionate age groups at work and out of work have taken place since 1929.

A Reasonable Theory
Doctor Believes Loveless Childhood May Be Cause Cause The "maligners, liars and swindlers" at large in the world today cannot help themselves—they have loveless childhoods.

That theory is advanced by Dr. C. H. Gundry in the Canadian Medical Association Journal. "Many difficulties arise as a result of emotional deprivation," he writes. "If parents are too poorly educated to expend love, if they really do not want their children, or if their children are brought up without parents, the child is deprived of the love which the children were deprived of a sort of emotional vitamin."

This diagram shows the value of the new terrain clearance indicator to aviation. It has been tested on a series of flights over New York and pronounced a success. Lord Tweedmouth Shakes Hands With Young Competitor Grizzled farmers on chugging tractors or behind straining teams of big horses, Lord Tweedmouth will welcome to the international plotting match, blue-ribbon event of the farm world that has attracted 600 competitors and 125,000 spectators to the rich farmland of the central Ontario mining flats.

Domesticated veterans of the age-old plow turned east upon as the Governor-General trumped rain-dampened ground examining the new furrows, poking a crown with his cane or congratulating a smiling competitor.

Speaking from the platform of a sound-broadcasting truck, the Governor-General said that coming from England and the threats of war to Canada and peace, "this plowing match is a good omen that we shall be allowed to get on with our proper business."

He mentioned briefly the European crisis that reached its peak during the English visit. He was never more impressed, he said, by the coolness of the British, their fortitude and common sense.

Artificial Wool
New Process For Manufacturing Product From Caslon A new process for the manufacture of artificial wool has been devised, it has been invented by two members of the United States Department of Agriculture. The inventors believe that it is the best yet devised for that used in making viscose rayon from cellulose. It differs from the Italian method of making artificial wool from caslon. The fibre resulting from the American process closely resembles the best quality of mohair wool. The new process is similar to that used in making viscose rayon from cellulose. It differs from the Italian method of making artificial wool from caslon. The fibre resulting from the American process closely resembles the best quality of mohair wool.

Has Important Place
Analysis Shows Man Over Forty Is Wanted In Business The wool complaint that the modern industrial and employed man finds a sharp contradiction in an analysis of employment made recently by insurance companies in the United States.

The survey was conducted on a national scale and was launched to determine what, if any, changes in the proportionate age groups at work and out of work have taken place since 1929.

A Reasonable Theory
Doctor Believes Loveless Childhood May Be Cause Cause The "maligners, liars and swindlers" at large in the world today cannot help themselves—they have loveless childhoods.

That theory is advanced by Dr. C. H. Gundry in the Canadian Medical Association Journal. "Many difficulties arise as a result of emotional deprivation," he writes. "If parents are too poorly educated to expend love, if they really do not want their children, or if their children are brought up without parents, the child is deprived of the love which the children were deprived of a sort of emotional vitamin."

This diagram shows the value of the new terrain clearance indicator to aviation. It has been tested on a series of flights over New York and pronounced a success. The apparatus is destined to prevent disastrous air crashes such as have occurred recently in mountainous regions. In flight, the old altimeter (bright indicator) showed the height above sea level only; the new indicator shows the airman how high he is above the terrain over which he is flying.

Taking Pleasure Jaunt
Former British Columbia Newspaper Man Selling East About World Favored by a spanking tallwind, Ernest J. Moy, formerly of British Columbia, sailed his 58-foot "luxury" yacht, the Dione, southward through the Gulf of Mexico waters on the first leg of an 80,000-mile story book pleasure jaunt around the world.

Aboard with Mr. Moy was his young wife, dressed in jersey and slacks and with a boy scout knitted strap on her wrist, and two Tampa seamen, Charles Schetter, 34, and William Hughes, 22. The crew's cleanest pants have, "London," via Singapore and way points, and Mr. Moy said, "When we get there, don't matter."

In fact the happy shipper, who has but one arm, said the jaunt may take five or even ten years. He spoke freely of his life's ambition to have been to circle the globe in his own ship.

Mr. Moy, who said he at one time owned several British Columbia newspapers and is now retired, purchased his yacht in New Haven, Conn., last year and with his wife sailed down the Atlantic coast and up the Gulf of Tampa. His home is in Seattle, Wash. He spent his previous lifetime making and preparing the craft for the long trip now under way, and included in equipment, rifles, side arms and a supply of tear gas, to be used, he said, "just in case."

Also aboard were hundreds of small articles such as scissors, knives, salt-pen, mirrors and colored ribbons to be used in trading with natives on the many islands en route.

Will Make Christmas Puddings
Princess Elizabeth Preparing To Bake Some For Her Friends Princess Elizabeth is preparing to bake Christmas puddings herself as gifts for some of her friends. Queen Elizabeth gave her an old family recipe which she herself used as a young girl. The Princess wrote to the Buckingham Palace chef, giving him a list of ingredients she wished to have at her disposal when she returned from Balmoral, Scotland.

When in London the 12-year-old Princess passes one day a week in the palace kitchens under the instructions of the chef.

Snicklefritz----

Milliner: "Pardon, Madame. This is
the hat you just bought: that's the
fox you're wearing."

How to tell if the singer is Scotch:
if he hangs on to the last note.

Bill: What is the hardest thing you
ever did?
Will: Make ten easy payments.

"I feel awfully sad. It's hard to
lose a wife."
"Hard! It's darn near impossible."

"Where are you going my pretty
maid?"
"I'm going a milking sir."

"In that dress, my pretty maid?"
"No, you dummel, in this bucket."

"A nickel for your thoughts Peto."
said Jean.
"Well," said Peto, "I was thinking
I'd like to kiss you, lassie."

Jean blushed but made no objection
and after the kiss they lapsed into
silence.

Peto's little Jean said: "And what are
you thinking about now. Another
kiss?"

"No, lassie, it's mair serious this

time. I was just wondering when you
were going to pay me that nickel for
my thoughts."

Phyllis: I give Reginald credit for
getting me a nice engagement ring.
Dora: I understand that's what the
jeweller did.

Women may not be deep thinkers,
but they are generally clothes ob-
servers.

"I caught my husband kissing the
maid."
"Good heavens! What did you do?"
"I made him buy me a new hat."

"And you fired the maid?"
"Oh, no, I need a new dress too."

ALBERTA AS HOST

The King and Queen, visiting Cana-
da next year will, of course, be the
guests of this province during their
stay here. Specifically their host will
be their representative, the lieutenant-
governor — the same arrangement
which is taken for granted in other
provinces. It has always been one of
the lieutenant-governor's functions to
entertain Their Majesties' representa-
tives, but very soon, for the first time
in history, Their Majesties themselves.

Precisely at this point something of
a problem arises in Alberta. For our
provincial legislators at last session
closed Government House in a magni-
ficent outburst of what they repre-
sent to be public economy and left
His Honor to make his own housing
arrangements.

This is the situation George VI and
Queen Elizabeth are likely to find
awaiting them when they arrive in
Edmonton. Where is Edmonton going
to ask the royal guests to stay? At
a hotel?

Presumably the proper authority at
the capital is arranging for some mon-
umental, some kinder hospitality than
this—Calgary, Alberta.

An arrangement from Edmonton
states that Government House may be
re-opened for the occasion of the visit
of Their Majesties.

FARMER "CLEAR THINKER"

SUMS UP THE SITUATION

"Service and satisfaction are all right. I ap-
preciate that in concerns handling my grain.

"But 60c from 80c is 20c a bushel. Those figures
tell a short, plain story.

"So my grain goes to —

ALBERTA POOL ELEVATORS

IT IS YOUR ELEVATOR !

You do not need to be a shareholder of the Company to think
of the United Grain Growers Elevator as your elevator. It was
built by a Farmers' Company for the use of farmers, and the
successful record of the Company has been made possible by the
continued patronage of many thousands of farmers.

DELIVER YOUR GRAIN TO

MULTIPLYING GOOD SEED

Two years ago the Okotoks Junior
Wheat Club started operations with 18
members and eighty bushels of regis-
tered wheat of the variety known as
Red Robs 222, supplied by the Alberta
Wheat Pool.

P. Berger, leader of the Okotoks
club, has figures to show that in two
years members of the club produced
fifty-two thousand bushels of pure

seed.

This is the type of seed improve-
ment of the seventy Junior Wheat
Clubs operating in Alberta this year,
have been doing to better the output
of wheat from Alberta farms.

Scientific agriculturists have com-
mented on the fact that wherever a
Junior Wheat Club is operating, im-
provement is soon noted in the seed
being sown in the district. Due, in a
large measure, to the activity of these

Junior Wheat Clubs, the quality of
the wheat seed being sown on Alberta
farms is steadily improving from year
to year.

CARD OF THANKS

Mr. and Mrs. Frank Sherry and
family wish to thank all those who
so kindly assisted and sent floral tri-
butes during the recent passing of
their daughter, Mary Helena.

THE WORLD AT
YOUR FIRESIDE

In the long winter evenings when weather or inclination
decreases that you stay at home, you will find a pleasant and
an interesting companion in your newspaper. No need to
go out to take an interest in what is going on. Here is news
of your neighbors, of events of world-wide importance,
of happenings in the realm of sport, of anything and every-
thing that has taken place in the world far and near.

There are features of particular interest to women. There
are sections with a special appeal for children. A good
newspaper provides interest and entertainment for the
whole family.

Here is an investment in leisure reading that will return
dividends in the wealth of information and the hours of
pleasure it brings you. You may be sure that a newspaper
will be welcomed by your entire household. Bring the
world to your fireside.
